

## Color the Seeds!

Pumpkins and other squash were very important local foods for Virginia Indians and the colonists in James Fort. These pumpkin/squash seeds in the shape of a pumpkin, along with about 600 more, were found with other trash in the Second Well. The squash were likely eaten and thrown away around 1612!

Once you have finished coloring your artifacts have an adult show you what they look like in real life by visiting: <https://historicjamestowne.org/jr-kids-at-home> #colorourcollections #JRKids
